INTERMEDIATE LISTENING · 50 MINUTES

What are genetically modified foods?

Listening for ideas and sound patterns

TODAY'S GOALS

By the end of class, you will be able to:

- Use key words about GM foods
- Understand the main ideas and details of a video
- Hear linking and stress in natural speech
- Share your opinion using new words

BEFORE LISTENING · WORD MATCH

Match each word to its meaning

gene · organism

modify · crop

trait · DNA

resistant · natural

A A small part of DNA that decides how a living thing looks

B Any living thing: plant, animal, or microbe

C To change something to make it better or different

D A plant grown by farmers for food

E A special quality or feature

F The material in cells that carries genetic information

G Able to fight off disease, insects, or damage

H Not made or changed by humans

BEFORE LISTENING · PREDICT

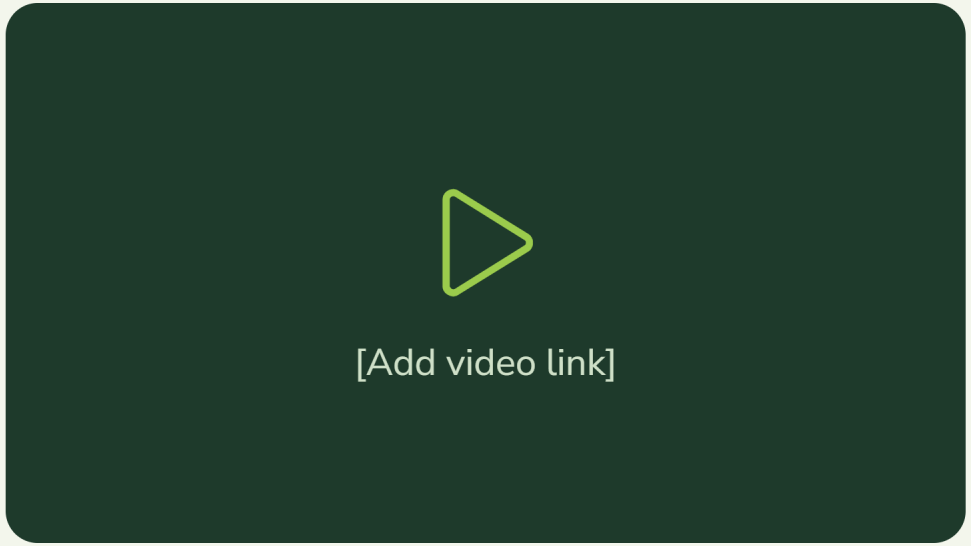

Which of these words do you expect to hear?

Write one prediction about the video on a sticky note and post it on the board.

LISTENING 1 OF 3 · MAIN IDEA

Watch once. No notes.

Write one sentence:

What is the video mainly about?

Then share with a partner.

LISTENING 2 OF 3 · DETAILS

Pick a question card from the basket

What is a genetically modified food?

Why do scientists modify foods?

What are some examples of GMOs?

What are some concerns about GMOs?

LISTENING 3 OF 3 · SOUND PATTERNS

Listen for words that join together

kind‿of

sounds like "kinda"

out‿of

sounds like "outta"

scientists WANT to CREATE

stress the key words

Write down 4 examples you hear. Then repeat after the video.

AFTER LISTENING · OPINION CORNERS

Go to the corner that matches your view

GM foods are good.

GM foods are bad.

I'm not sure.

Why do you think that? What did you learn from the video? Use at least **3 new words**.

EXIT TICKET

On a sticky note, write:

1 new word

1 thing you learned about GM foods
